

SOFTWARE ENGINEER

Jonatas Pedraza

Backend, architecture, and cloud for products that must scale with reliability.

jonatas.nona@gmail.com [LinkedIn](#) [GitHub](#) Carpina, PE, Brazil

ABOUT

Software Engineer with experience in backend development, scalable platforms, software architecture, cloud computing, and DevOps practices. Worked on credit, payments, delivery, telecom, video, and big data products — from requirements and architectural design through implementation, observability, automation, and production support. Generalist, collaborative, quality-oriented profile with a strong foundation in Node.js, TypeScript, Python, AWS, relational and NoSQL databases, messaging/cache, and infrastructure as code.

EXPERIENCE

Software Engineer @ Nuvemshop

Mar 2024 — Present · São Paulo, Brazil

- Building and evolving the credit platform with focus on scalability, reliability, and business alignment.
- Integrating partner APIs for credit engine flows, data exchange, and process automation.
- Developing internal backoffice tools in a lean squad with product, design, and operations.
- Investigating and resolving production incidents with Datadog and observability practices.

TypeScript · Node.js · React · PostgreSQL · Redis · AWS · Datadog

Software Architect @ Delivery Much Brasil

Jun 2021 — Feb 2024 · Santa Catarina, Brazil

- Designed and delivered food-delivery solutions using microservices, design patterns, and AWS.
- Led requirements analysis, refinements, and technical alignment with the business.
- Supported tech leads on standards, architecture, documentation, and CI practices.
- Coded in critical squads dealing with legacy systems, integrations, and high-priority deliveries.

NestJS · Node.js · TypeScript · Docker · MongoDB · PostgreSQL · Redis · Elasticsearch

Software Engineer @ Pagar.me

Aug 2017 — Jun 2021 · São Paulo, Brazil

- SRE work on online payment systems: architecture, development, and infrastructure improvement.
- Supported squads on Elasticsearch clusters and DevOps practices for performance, reliability, and scale.

Python · JavaScript · Go · C# · AWS · Terraform · Packer · Ansible · Docker

System Integration Engineer @ Nokia Networks

Dec 2015 — Aug 2017 · Rio de Janeiro, Brazil

- Developed, provisioned, and orchestrated telecom solutions, including IoT and ETL with Greenplum and MySQL.
- Automated Linux environments with Ansible and Shell Script using cloud, Git, Elasticsearch, and design patterns.

Ansible · Shell Script · Linux · MySQL · Greenplum · Elasticsearch · Git

Software Engineer @ Globo.com

Nov 2014 — Nov 2015 · Brazil

- Backend services for the video platform focused on performance, scale, and resilience (live and on-demand).
- Contributed to DevOps and CI/CD with Python, Node.js, Redis, Docker, PostgreSQL, MongoDB, Elasticsearch, and Nginx.

Python · Node.js · JavaScript · Redis · Docker · PostgreSQL · MongoDB · Elasticsearch · Nginx

SKILLS

Backend & APIs — Node.js, TypeScript, NestJS, Python, Go, C#, REST, Microservices

Architecture — Clean Code, Clean Architecture, Design patterns, Distributed systems, Scalability, Resilience

Cloud & DevOps — AWS, Docker, Terraform, Packer, Ansible, CI/CD, Linux, Shell Script

Data & Observability — PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Datadog, Metrics, Logs
